### **New NavKeys for Nobeltec Software**

Sydney, Australia, July 14, 2006 — Today MR Marine Electronics, announced NavKeys for Nobeltec Navigation Software will be released at the Sydney International Boat Show, August 3 to 8. It will be on Display at the MR Marine-Nobeltec Stand 240-241.

“NavKeys is a strip keyboard with 16 Keys. Each key has a Nobeltec Coloured Icon on it that allows one key access to the 16 most used Navigation Functions, such as Center Boat, Zoom In, Zoom Out, Tracking, Event Marks, Tides etc. It gives a PC running Nobeltec Software the ease of single key functions similar to a Chart plotter, and is always ready unlike a mouse or Track Ball that can move around due to rolling or vibration” said Mark Rothwell, Senior Partner of MR Marine Electronics.

“Navkeys was designed, after speaking to the many happy customers we have using Nobeltec Software. Many asked for single key operation of the most used functions and NavKeys is the end result of this. It has proved so successful in testing that we have now included it as standard in our InView Navigation Systems.”..... he continued

MR Marine Electronics is a specialist in building and designing fully integrated Marine Computer Systems, and is the Australian Distributor for Nobeltec-Jeppessen Navigation Products including Software, Radars, and Sounders.
