New InView Weather Station

Sydney, Australia, July 14, 2006 — Today MR Marine Electronics, announced the InView Weather Station will be released at the Sydney International Boat Show, August 3 to 8. It will be on Display at the MR Marine-Nobeltec Stand 240-241.

“The InView Weather Station provides seven essential Weather Readings with No Moving Parts. Using Ultrasonic Sensors in one compact Transducer, the InView Weather Station can replace upto 7 individual transducers.” said Mark Rothwell, Senior Partner of MR Marine Electronics.

“Before leaving the marina, anticipate weather fronts by checking the wind speed and direction, temperature and barometric pressure. Check the weather history graphs as the InView Weather Station takes readings from the previous day, even while the PC is turned off. While underway, the true wind data can be sent to the autopilot to correct course, and get you to your destination more quickly and efficiently than ever before. While docking, true wind data displayed on the InView Navigation System PC or chartplotter will make docking your vessel in high wind situations a breeze. The easy-to-use PC software has multiple screen views and backgrounds to fit your needs. The wind tunnel-tested, compact sensor with removable cable makes for a simple installation. The built-in GPS can serve as a primary position source or backup to your existing electronics suite.”..... he continued

Functions include

- GPS
- Compass
- True Wind
- Apparent Wind
- Air Temperature
- Humidity
- Barometer
- Dual Point
- Wind Chill

MR Marine Electronics is a specialist in building and designing fully integrated Marine Computer Systems, and is the Australian Distributor for Nobeltec-Jeppessen Navigation Products including Software, Radars, and Sounders.
