

NEW PRODUCT RELEASES

the SYDNEY international
BOATSHOW

As provided by the exhibitor.

Company Name: AMI SALES	Brand of Product: NEXUS MARINE
Company Representative : JEFF NELMES	Mobile contact : 0407787099
Website : www.nexusmarine.se	Stand Number/ Location: Stand 610 - Hall 6

Model code of the new product: NXR

Description of new product :

NXR – THE NEW GRAND PRIX INSTRUMENTATION SYSTEM FROM NEXUS

Showing for the first time at the Sydney Boat Show, the NXR from Nexus Marine represents the best in state-of-the-art performance measurement and analysis.

Unique Features / other information :

Unashamedly aimed at the international racing circuit and superyacht sector, the NXR is designed to act as the central nervous system on the most sophisticated sailing boats.

Designed around the central principles of being flexible, customisable and straightforward to use, the system is capable of collecting and processing data from transducers, load sensors, tactical software programs, GPS chartplotters, PC inputs and more, and then relaying both that information and a wide variety of tactical and predictive analysis to the helmsman, afterguard and crew in the combination and format of the individual's choice.

The heart of the system is the powerful Nexus network which enables the processing of large amounts of acquired data and its presentation when and where it is required in real-time. New Multi-Control Displays allows users to choose their own preferred display combinations and parameters, while the all-new XLR mast displays keep the entire crew locked on to those all-important performance indicators.

The XLR mast displays are the result of extensive market research, with the 63.5mm digits judged the ideal size for clear yet unobtrusive viewing. The rugged, waterproof casings are built to take whatever the ocean throws at them, and the choice of red or green backlighting for night-time viewing enables tired eyes to instantly pick out critical data.

NXR is designed for easy 'plug and play' installation and is compatible with a wide range of tactical software packages. The range of data collected and analysed by the NXR has to be experienced to be believed, but the integral NX Race software provides tacticians with a host of analytical options based on prevailing conditions and boat performance parameters, continuously updated as new information flows in from transducers, tidal and current databases, digitised polars, and much more.

With the Nexus NXR, seeing is believing!

**The Sydney International Boat Show
2 to 7 August 2007 – Darling Harbour, Sydney - www.sydneyboatshow.com.au**
