Company Representative : JEFF NELMES	Mobile contact : 040787099
Website : WWW.NEXUSMARINE.SE	Stand Number/ Location: STAND 610 - HALL 6

Model code of the new product: NX SERIES

### Description of new product :

#### **NX – WIRELESS WHERE IT MAKES SENSE**

New for the 2007 season, the NX instrumentation suite from Nexus Marine provides high-quality, compact instrumentation for the sportsboat and cruising sailor using technology usually associated with high-end racing systems

### Unique Features / other information :

These stylish and competitively priced systems - featuring wireless connection to the wind transducer -will fit the needs of a wide variety of yachtsmen. Sportsboats, cruising sail boats, motor boats, open day boats, even RIBs will find Nexus NX the ideal package for their needs. The system can also easily be upgraded to the Nexus NX2 racing system for those yachtsmen who subsequently wish to undertake competitive sailing.

The heart of NX is the Sea Data display (pictured above). This interfaces either directly or via a compact 'black box' (WSI – wireless sensor interface) with 43mm, 52mm or triducer (speed, depth and temperature in a single unit) transducers to display speed and depth, the two most important pieces of information for every yachtsman, on its large, high visibility screen. In addition it also displays total distance travelled and water temperature, and features deep and shallow alarms and a start timer – a level of capability unequalled by other comparable systems.

The addition of an optional wireless wind transducer – ideal for easy, cable-free installation on carbon, aluminium and wooden masts – gives instant access to true and apparent wind speeds and angles via the NX Wind display.

For those owners looking to upgrade their NX to a racing specification all that is required is to add an NX2 server. The Sea Data displays are fully compatible with the racing system, and the user simply adds more displays as required. Simple, and highly cost effective.

With its very competitive pricing, the NX is a flexible and stylish instrumentation suite that offers a great deal at an affordable cost to a broad spectrum of sailors.

## **The Sydney International Boat Show**

**2 to 7 August 2007 – Darling Harbour, Sydney - [www.sydneyboatshow.com.au](http://www.sydneyboatshow.com.au)**
