CGT - Stamford (VSIG) Variable Speed Intergrated Generators - 11 models from 5KVA to 100 KVA. (One unit only will be on display at the show ie 12 KW model)

Unique Features / other information :

ISUZU, This is the first time that a factory marinised Isuzu Diesel engine for marine propulsion has been displayed in Australia. The units are in wide use in North America and Japan however they have never been displayed or marketed in Australia.
CGT - Stamford, (VSIG) This range of VARIABLE SPEED INTERGRATED GENERATORS are manufactured in the UK. The VSIG is revolutionary in concept and design. A display unit (only) was shown at Sanctuary Cove and our intention is to show an operational unit in Sydney. Apart from this showing it's the first time a variable speed unit has been shown anywhere in Australia. Depending on model, the speed range is 1000 to 3000 RPM and output 5 KVA to 100 KVA.

The Sydney International Boat Show

2 to 7 August 2007 – Darling Harbour, Sydney - www.sydneyboatshow.com.au
