Model code of the new product: Stress Free Anchor Winch

Description of new product :

The Stress Free is the first and original anchor well mounted drum style anchor winch suitable for both inshore and offshore fishing. The winch is a compact 12volt, 24 volt and/or hydraulic unit. The Stress Free is robust and built to last and ideal for narrow and shallow anchor wells. The drum and solid shaft of the unit is manufactured from marine grade 316 stainless steel with the electric motor being waterproof. Single person operation is achieved with the inclusion of a dual direction solenoid, resettable circuit breaker and remote up/down toggle switch. Due to the robust construction of the running gear there is no need to tie off once you have set the anchor - an excellent safety feature. The reliability of our product is backed up by a 36 month warranty to recreational users and 12 months to professional fisherman and/or charter operators.

Unique Features / other information :

No need to tie off your rope when at anchor; All rope and chain is held on the drum; Eliminates rope tangling; Raise and lower your anchor with the flick of a switch; Lowers and retrieves at 80-90 feet/minute; Use your existing rope and chain; User friendly; No routine maintenance required; Built to last.
