

NEW PRODUCT RELEASES

the SYDNEY international
BOATSHOW

As provide by the exhibitor.

Company Name: DeckHardware	Brand of Product: Velocitek
Company Representative : Mel	Mobile contact : 0407 180 381
Website : www.deckhardware.com.au	Stand Number/ Location: 133-134

Model code of the new product: Velocitek SC-1

Description of new product :

The Velocitek SC-1 harnesses the power of GPS to give you the functionality of a complete instrument suite in a self-contained device that can be mounted anywhere on your boat. The SC-1 installs in seconds and does not require any external wiring or through hull transducers.

In addition to providing real-time speed, heading and VMG information, the SC-1 also stores and organizes speed, heading, position, and time records for your most recent 40 hours of sailing. When you're racing away from home, bring your SC-1 with you and you will be able to capture a complete record of your performance on each day of the event. When you get home you will be able to easily download the automatically sorted tracks for replay and analysis on your PC.
