Model code of the new product: Interphase Forward Sonar VGA 7 System

Description of new product : The new Interphase VGA-7™ is a wide, sunlight viewable colour display with integral keypad for use with the forward looking SE-200 Sonar Engine™ released earlier this year, and allows skippers to view the underwater area ahead of the vessel to help navigate shallow channels, warn of shallowing bottom conditions, indicate the presence of underwater objects including rocks, reefs and schools of bait and fish.

Unique Features / other information :  
Flexibility and Power, Owners can use the simultaneous composite video, VGA and Interphase sonar display out ports to connect to many different types of displays including Raymarine, Garmin, Northstar, Furuno and flat panel displays or computer monitors or TV's.
