

SEABOB CAYAGO F7 – The high-performance toy

CAYAGO AG of Stuttgart to present the new SEABOB CAYAGO F7 at Sydney Boat Show 2008: even more performance, exceptional colours and sporty accessories – the F7 is the absolute "must have" for water sports.

See it, and you'll be wonderfully surprised. Ride it, and you'll be hooked. Own it, and you'll never want to part with it: SEABOB, the world's fastest water and diving scooter "Made in Germany", was successfully premiered two years ago at the "boot" 2006 in Düsseldorf.

Now it has dived into the hearts of the water-sports community and firmly established itself as an ultra modern, exciting water-sports item with a touch of the masculine lifestyle.

And the story of its success continues.

As they say "Being special makes the difference", CAYAGO AG will be presenting the new SEABOB CAYAGO F7 at this year's Sydney Boat Show. It is the embodiment of strength, technological intelligence and perfected function.

With 7 HP, it delivers 40 % more power output and thereby provides an ultra dynamic riding experience at up to 22 km/h on the surface and 16 km/h under water. Fun and excitement guaranteed! It draws its power from 14 Li-Ion accumulators. And like all SEABOB jets, it is driven by the patented and unique electro technology that is free of all emissions and thus 100 % environmentally friendly.

As a new extra, the SEABOB CAYAGO F7 has a specially developed belt system that transforms the tremendous thrust of 70 kg into a relaxing driving experience and even greater agility in the water – whether the pilot is in 1st or 10th gear, diving to 2 m or 40 m. And for those who want more choice in looks, the F7 is available in a range of eight colours.

CAYAGO AG sets new standards in water sports with the CAYAGO F7.

Visit us at Sydney Boat Show, July 31st to August 5th 2008, Stand 615.
