Website : www.seabob.com	Stand Number/ Location: 615

Model code of the new product: Cayago F7

Description of new product :  
SEABOB – on the way to Homo aquaticus

Water covers seven-tenths of the Earth's surface. Yet man could not be less prepared for the world's prevailing medium. Man is slow, sluggish and barely able to take part in life under water. At least, until now. For SEABOB opens up completely new possibilities.

SEABOB is the world's fastest water and diving scooter. With its outstanding technology and performance, swimmers and divers acquire a speed never known before. Be it the intoxication of speed, the sporting challenge, the absolute thrill of diving or the emotion of leisurely gliding over reefs or the water surface, SEABOB opens up completely new worlds for its rider.

There are four different SEABOBs. Common to all is the innovative drive with the revolutionary, patented combination of high-energy lithium ion accumulators and an extremely powerful Jetstream motor. In addition to the powerful SEABOB Ravejet (3 hp) and SEABOB Jet 4.12 (4 hp) models, as well as the SEABOB VX2 (5 hp) model, the range has now been topped by the powerful SEABOB F7.

With a power output of 7 hp, the SEABOB F7 develops a thrust of more than 70 kilograms at full power and a speed of up to 22 kilometres per hour over water. A newly developed belt system ensures that the rider can relax and enjoy this enormous power for a long time. Power and speed in a completely new dimension.
