Website : www.mcintyre-equipment.com.au	Stand Number/ Location: 316

Model code of the new product: VETUS M4.55
--

Description of new product :

The M4.55 is the first turbo charged Mitsubishi engine produced by VETUS which outputs 52Hp at 3000Rpm. Turbo-Charging this particular model of engine has not only improved the engines torque out-put but has also vastly improved its power to weight ratio. Coming in at only 192kg including the extremely robust Hydraulic ZF 25 series transmission or optional ZF Sail Drive, makes it a great option for any vessel. This tidy engine package boasts a 110Amp alternator, 4 of VETUS' highly flexible engine mounts, 4 metre wiring loom and engine panel which includes tach/hour meter, voltmeter, buzzer, starter switch and five warning lights. The M 4.55 like all Vetus engines also includes as standard exhaust temperature sensing, alerting the operator to any possible engine and exhaust damaged due to reduced sea water flow
