

COOPERSLOOP

Quality.
Flexibility.
Luxury.

The ultimate European day-boat

The Coopersloop 745 blends modern, European design with a traditional hull-form and quality fittings and fixtures. The solid, lifeboat-derived displacement hull provides a high degree of inherent stability and excellent sea-keeping abilities. This configuration also provides real fuel economy, and our boats cruise all weekend at a comfortable 20 km/h using less than 3 litres per hour.

The Coopersloop is designed in Europe and manufactured under license by an established commercial boatyard in North-Eastern China. At 7.45m (just over 24 feet), the Coopersloop is a substantial boat that provides a safe, very comfortable platform for up to 10 people.

The Coopersloop is fitted with a reliable Yanmar diesel engine and comes standard with a long list of innovative and sensible equipment. A range of options such as teak decks, swim platform, electric fridge and bow thruster are also available. The fibreglass hull, seating cushions, and hood/cover fabrics, are all available in a wide range of colours, which provides a great opportunity for owners to customise their boat.

Enjoy the gentle, sea-kindly motion that these unique family boats offer while you explore your favourite river, bay or harbour.

There are 3 x versions available:

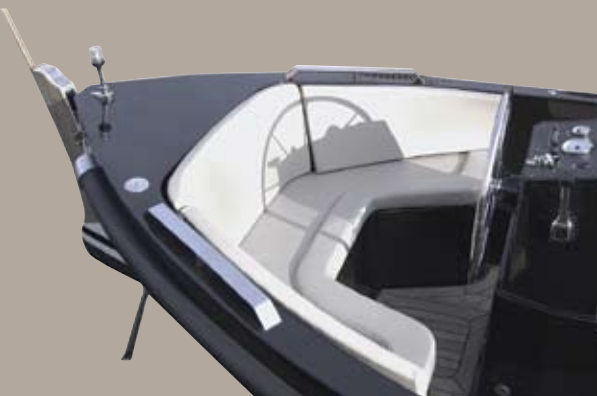

Coopersloop PURE: \$59,000

Coopersloop PRO: \$69,000

Coopersloop PLUS: \$79,000
