Description of new product :

FURUNO

GP-33 NMEA2000/0183 Multi Data GPS Unit : 4.3" colour LCD capable of displaying Plotter, Steering, Highway, NAV data, User display 1, User display 2, Satellite Monitor Display.

RD-33 NMEA2000/0183 Multi Data Display : 4.3" colour LCD capable of displaying Nav data, Highway, Heading, Speed, Depth Graph, Graph, Layline, STW, SOG, RPM, Rudder, Wind angle, Air temp, Humid, Roll & pitch, ROT, Battery, Engine temp, Oil pressure, Oil temperature, Coolant pressure, Trim, Watch

MU-150HD & MU-190HD High Definition Displays : IP56 rated crystal clear 15"/19" Marine Grade monitors for use as main or remote display, with screen resolution of up to SXGA.

Inmarsat Fleet Broadband FELCOM 250 : Simultaneous access to voice and high-speed data communications with Global coverage provided through three Inmarsat-4 satellites (except for polar regions). Fleet Broadband brings ship-to-shore/ship-to-ship operational and social communications to the broadband era.

FLIR

M-Series Multi-Sensor Maritime Night Vision System: FLIR thermal imagers let you see clearly in total darkness, using the latest technologies available. In fact, they're the best commercial maritime thermal night vision systems you can find outside of the Pentagon. It's no wonder, coming from the world leader in commercial thermal imaging systems - FLIR.

M-Series cameras feature the clearest most detailed thermal imagery, more than twice the detection range of earlier systems with Lowlight TV Camera and color on-screen symbology.

HM-Series Hand Held Maritime Thermal Camera: The HM-Series are handheld shock-resistant thermal imaging cameras. They produce a crisp image in the darkest of nights. The HM-Series will drastically increase your situational awareness. The HM-Series can be used on board of all types of vessels. Commercial ships, yachts, police and law enforcement boats, they will all benefit from the power of thermal imaging.

WASSP

WASSP/Navigator Multibeam Fishing System: WASSP Navigator will enable you to build and save very detailed bathymetric profiles, to record fish shoal information and to share this information with other WASSP users or vessels. Navigator is a management tool to enable you to highlight, profile, view in any direction - 2D or 3D, save and print information you collect about the marine environment.

INTELLIAN

T-110 & T-130 3-AXIS Stabilized Satellite TV Antenna System : The T-110 & T-130 is the most powerful and robust 3-axis stabilized satellite TV antenna system on the market. With an outstanding coverage range that outperforms other system in its class. With its patented WRS and DBT, fast search and tracking signal lock technologies, the T-110 & T-130 provides a rock-steady satellite signal reception, even in the harshest conditions at sea. With its built-in global satellite library, the T-110 & T-130 is able to receive TV service from multiple satellites from around the globe.
