Model / code of the new product: Sun 3W LED Down Light

Description of new product :
In keeping with it's tradition for innovation over the past 30 years, Gineico are proud to announce the Australian release of the Italian designed and manufactured SUN 3W LED down light.

Unique Features / other information :
This latest generation ultra-high output LED down light has a stainless frame with a fully integrated 3W single head warm white LED globe. It is dimmable and unlike many other down lights, it boasts a wide beam to achieve the most efficient and comfortable constant level of light throughout the boat, even in vessels with very low head room. Most remarkably the fitting requires only a 10mm recess depth and through incredibly clever design, the heat dissipates from the front of the fitting so the fitting can be fitted hard up against the deck head. Lower recess depth means higher headroom! Should recess depth not be available, it can be supplied with a surface mounting kit.
